Computational methods for electronic structure

Vibrational corrections to linear and nonlinear static electric properties of polyatomic molecules at non-optimum reference geometry, V.E. Ingamells, M.G. Papadopoulos and A.J. Sadlej 260 (2000) 1

On the validity of the equivalent cores approximation for computing X-ray photoemission and photoabsorption spectral bands, O. Plashkevych, T. Privalov, H. Agren, V. Carravetta and K. Ruud 260 (2000) 11

Orbital imaging for the valence shell of sulphur dioxide: comparison of EMS measurements with near Hartree–Fock limit and density functional theory, R. Feng, Y. Sakai, Y. Zheng, G. Cooper and C.E. Brion 260 (2000) 29

Ab initio calculation for inner reorganization energy of gas-phase electron transfer in organic molecule–ion systems, X.-Y. Li, J. Tong and F.-C. He 260 (2000) 283

-perturbative and many body approaches

Cytosine anions: ab initio study, D.M.A. Smith, A.F. Jalbout, J. Smets and L. Adamowicz 260 (2000) 45

Substituent effects on the intramolecular proton transfer in the ground and lowest-lying singlet excited states of salicylaldimine, M. Forés, M. Duran and M. Solà 260 (2000) 53

The equilibrium N–H bond length, J. Demaison, L. Margulès and J.E. Boggs 260 (2000) 65

Vertical triple ionization of ethyne molecules in triple-electron-transfer collisions with O²⁺ beam ions, N. Jeffreys, D.E. Parry and F.M. Harris 260 (2000) 295

-density functional theory

The equilibrium N–H bond length, J. Demaison, L. Margulès and J.E. Boggs 260 (2000) 65

Structure and ground and first electronic excited state vibrational modes of the ethyl-*p*-aminobenzoate conformers, A. Longarte, J.A. Fernández, I. Unamuno and F. Castaño 260 (2000) 83

Vibronic interactions in {6} and {18}hetero(A,B)annulenes, M. Tachibana and K. Yoshizawa 260 (2000) 303

Theoretical analysis of low-lying vibrational modes of free canonical 2-deoxyribonucleosides, O.V. Shishkin, A. Pelmenschikov, D.M. Hovorun and J. Leszczynski	260 (2000) 317
Density functional theory and Hartree-Fock-density functional theory calculations of ^{17}O , ^{33}S , and ^{73}Ge quadrupole coupling constants, W.C. Bailey, F.M. Gonzalez and J. Castiglione	260 (2000) 327
<i>Semiempirical methods</i>	
Semi-empirical study of chain conformation and absorption spectra of polyanilines: size, solvent and disorder effects, Z.T. de Oliveira Jr. and M.C. dos Santos	260 (2000) 95
A modified perturbed hard-sphere-chain equation of state: consideration of attractive contribution, I.H. Kim and Y.C. Bae	260 (2000) 337
<i>Algebraic approaches</i>	
An extended SU(2) model for coupled Morse oscillators, M. Carvajal, R. Lemus, A. Frank, C. Jung and E. Ziemniak	260 (2000) 105
<i>Spin states and magnetic interactions</i>	
Recombination yield of geminate radical pairs in high magnetic fields: general results and application to free diffusion, M.J. Hansen, A.A. Neufeld and J.B. Pedersen	260 (2000) 125
<i>Molecular response to external fields (incl. optical susceptibilities, dichroism, hyperpolarizabilities)</i>	
Vibrational corrections to linear and nonlinear static electric properties of polyatomic molecules at non-optimum reference geometry, V.E. Ingamells, M.G. Papadopoulos and A.J. Sadlej	260 (2000) 1
<i>Reactive molecular dynamics including dissipative processes</i>	
Photodissociation dynamics of CH_2BrCl at 234 nm, S.-H. Lee, Y.-J. Jung and K.-H. Jung	260 (2000) 143
<i>Intramolecular dynamics</i>	
Impulsive IR-multiphoton dissociation of acrolein: observation of non-statistical product vibrational excitation in $\text{CO}(v = 1 - 12)$ by time resolved IR fluorescence spectroscopy, P.K. Chowdhury	260 (2000) 151
Theoretical analysis of low-lying vibrational modes of free canonical 2-deoxyribonucleosides, O.V. Shishkin, A. Pelmenschikov, D.M. Hovorun and J. Leszczynski	260 (2000) 317
<i>Molecular dynamics of many particle systems and condensed phases</i>	
Intermolecular potential for benzoic acid-water based on the test-particle model and statistical mechanical simulations of benzoic acid in aqueous solutions, K. Sagarik and B.M. Rode	260 (2000) 159
<i>Statistical computational methods (incl. Monte Carlo)</i>	
A rigorous procedure for combining molecular dynamics and Monte Carlo simulation algorithms, L.J. LaBerge and J.C. Tully	260 (2000) 183
Hopfield neural network model for calculating the potential energy function from second virial data, J.P. Braga, M.B. de Almeida, A.P. Braga and J.C. Belchior	260 (2000) 347

Non-equilibrium statistical mechanics

Vibrational energy storage in high pressure mixtures of diatomic molecules, E. Plönjes, P. Palm, W. Lee, M.D. Chidley, I.V. Adamovich, W.R. Lempert and J.W. Rich 260 (2000) 353

Equilibrium statistical mechanics and thermodynamics

A rigorous procedure for combining molecular dynamics and Monte Carlo simulation algorithms, L.J. LaBerge and J.C. Tully 260 (2000) 183

A modified perturbed hard-sphere-chain equation of state: consideration of attractive contribution, I.H. Kim and Y.C. Bae 260 (2000) 337

Experiment**Molecular spectroscopy**

Semi-empirical study of chain conformation and absorption spectra of polyanilines: size, solvent and disorder effects, Z.T. de Oliveira Jr. and M.C. dos Santos 260 (2000) 95

The effect of carbonyl complexation on highly exothermic vanadium oxidation reactions, M.J. McQuaid and J.L. Gole 260 (2000) 367

-microwave

Density functional theory and Hartree-Fock-density functional theory calculations of ^{17}O , ^{33}S , and ^{73}Ge quadrupole coupling constants, W.C. Bailey, F.M. Gonzalez and J. Castiglione 260 (2000) 327

-infrared

An extended SU(2) model for coupled Morse oscillators, M. Carvajal, R. Lemus, A. Frank, C. Jung and E. Ziemniak 260 (2000) 105

Impulsive IR-multiphoton dissociation of acrolein: observation of non-statistical product vibrational excitation in CO ($v = 1-12$) by time resolved IR fluorescence spectroscopy, P.K. Chowdhury 260 (2000) 151

Infrared and Raman spectra of 4-(dimethylamino)benzonitrile and isotopomers in the ground state and vibrational analysis, H. Okamoto, H. Inishi, Y. Nakamura, S. Kohtani and R. Nakagaki 260 (2000) 193

Vibrational energy storage in high pressure mixtures of diatomic molecules, E. Plönjes, P. Palm, W. Lee, M.D. Chidley, I.V. Adamovich, W.R. Lempert and J.W. Rich 260 (2000) 353

-Raman

Infrared and Raman spectra of 4-(dimethylamino)benzonitrile and isotopomers in the ground state and vibrational analysis, H. Okamoto, H. Inishi, Y. Nakamura, S. Kohtani and R. Nakagaki 260 (2000) 193

Vibrational energy storage in high pressure mixtures of diatomic molecules, E. Plönjes, P. Palm, W. Lee, M.D. Chidley, I.V. Adamovich, W.R. Lempert and J.W. Rich 260 (2000) 353

-UV

Temperature dependent photoabsorption cross sections of allene and methylacetylene in the VUV-UV region, F.Z. Chen, D.L. Judge and C.Y.R. Wu 260 (2000) 215

Photoionization studies of $\text{C}_2\text{H}_5\text{I}$ and C_6H_6 perturbed by Ar and SF_6 , C.M. Evans, J.D. Scott, F.H. Watson and G.L. Findley 260 (2000) 225

The photoabsorption and constant ionic state spectroscopy of vinylbromide, A. Hoxha, R. Locht, B. Leyh, D. Dehareng, K. Hottmann, H.W. Jochims and H. Baumgärtel	260 (2000) 237
<i>-visible</i>	
The effect of carbonyl complexation on highly exothermic vanadium oxidation reactions, M.J. McQuaid and J.L. Gole	260 (2000) 367
<i>Photon counting and phase fluorimetry</i>	
Effect of solvent polarizability on dual fluorescence of <i>EE</i> -1-phenyl,4-(1'-pyrenyl)-1,3-butadiene, E. Marri, G. Galiazzo, U. Mazzucato and A. Spalletti	260 (2000) 383
<i>Photoelectron and Auger spectroscopy</i>	
On the validity of the equivalent cores approximation for computing X-ray photoemission and photoabsorption spectral bands, O. Plashkevych, T. Privalov, H. Ågren, V. Carravetta and K. Ruud	260 (2000) 11
<i>Multiphoton ionization</i>	
Structure and ground and first electronic excited state vibrational modes of the ethyl- <i>p</i> -aminobenzoate conformers, A. Longarte, J.A. Fernández, I. Unamuno and F. Castaño	260 (2000) 83
The effect of carbonyl complexation on highly exothermic vanadium oxidation reactions, M.J. McQuaid and J.L. Gole	260 (2000) 367
<i>X-ray spectroscopy</i>	
On the validity of the equivalent cores approximation for computing X-ray photoemission and photoabsorption spectral bands, O. Plashkevych, T. Privalov, H. Ågren, V. Carravetta and K. Ruud	260 (2000) 11
<i>Electron impact spectroscopy</i>	
Orbital imaging for the valence shell of sulphur dioxide: comparison of EMS measurements with near Hartree-Fock limit and density functional theory, R. Feng, Y. Sakai, Y. Zheng, G. Cooper and C.E. Brion	260 (2000) 29
UV, VUV and soft X-ray photoabsorption of dimethyl ether by dipole (e,e) spectroscopies, R. Feng, G. Cooper and C.E. Brion	260 (2000) 391
<i>Laser induced fluorescence</i>	
Electronic spectroscopy and structures of the van der Waals complexes of α , ω -dihaloalkanes with anthracene, J.C. Hlady and R.P. Steer	260 (2000) 249
Linear and convolution methods for the analysis of ground and excited state kinetics. Application to the monomer-excimer scheme, M.N. Berberan-Santos, J.P.S. Farinha and J.M.G. Martinho	260 (2000) 401
Relaxation of photo-exitations in films of oligo- and poly-(<i>para</i> -phenylene vinylene) derivatives, S.C.J. Meskers, R.A.J. Janssen, J.E.M. Haverkort and J.H. Wolter	260 (2000) 415
<i>Nonlinear optics and spectroscopy</i>	
Vibrational corrections to linear and nonlinear static electric properties of polyatomic molecules at non-optimum reference geometry, V.E. Ingamells, M.G. Papadopoulos and A.J. Sadlej	260 (2000) 1

Synchrotron spectroscopies

Photoionization mass spectrometry of six isomers of C_7H_8 in the 7-22 eV photon energy range, M. Schwell, F. Dulieu, C. Gée, H.-W. Jochims, J.-L. Chotin, H. Baumgärtel and S. Leach

260 (2000) 261

Atomic and molecular beam techniques

Photodissociation dynamics of CH_2BrCl at 234 nm, S.-H. Lee, Y.-J. Jung and K.-H. Jung

260 (2000) 143

Mass spectroscopy

Structure and ground and first electronic excited state vibrational modes of the ethyl-*p*-aminobenzoate conformers, A. Longarte, J.A. Fernández, I. Unamuno and F. Castaño

260 (2000) 83

Photoionization mass spectrometry of six isomers of C_7H_8 in the 7-22 eV photon energy range, M. Schwell, F. Dulieu, C. Gée, H.-W. Jochims, J.-L. Chotin, H. Baumgärtel and S. Leach

260 (2000) 261

Vertical triple ionization of ethyne molecules in triple-electron-transfer collisions with O^{2+} beam ions, N. Jeffreys, D.E. Parry and F.M. Harris

260 (2000) 295

Objects**Bulk systems***Gases*

On the validity of the equivalent cores approximation for computing X-ray photoemission and photoabsorption spectral bands, O. Plashkevych, T. Privalov, H. Agren, V. Carravetta and K. Ruud

260 (2000) 11

An extended SU(2) model for coupled Morse oscillators, M. Carvajal, R. Lemus, A. Frank, C. Jung and E. Ziemiak

260 (2000) 105

Impulsive IR-multiphoton dissociation of acrolein: observation of non-statistical product vibrational excitation in CO ($v = 1-12$) by time resolved IR fluorescence spectroscopy, P.K. Chowdhury

260 (2000) 151

Temperature dependent photoabsorption cross sections of allene and methylacetylene in the VUV-UV region, F.Z. Chen, D.L. Judge and C.Y.R. Wu

260 (2000) 215

Photoionization studies of C_2H_5I and C_6H_6 perturbed by Ar and SF_6 , C.M. Evans, J.D. Scott, F.H. Watson and G.L. Findley

260 (2000) 225

Ab initio calculation for inner reorganization energy of gas-phase electron transfer in organic molecule-ion systems, X.-Y. Li, J. Tong and F.-C. He

260 (2000) 283

Density functional theory and Hartree-Fock-density functional theory calculations of ^{17}O , ^{33}S , and ^{73}Ge quadrupole coupling constants, W.C. Bailey, F.M. Gonzalez and J. Castiglione

260 (2000) 327

Supersonic beams

Structure and ground and first electronic excited state vibrational modes of the ethyl-*p*-aminobenzoate conformers, A. Longarte, J.A. Fernández, I. Unamuno and F. Castaño

260 (2000) 83

Liquid mixtures and solutions

Semi-empirical study of chain conformation and absorption spectra of polyanilines: size, solvent and disorder effects, Z.T. de Oliveira Jr. and M.C. dos Santos 260 (2000) 95

Intermolecular potential for benzoic acid-water based on the test-particle model and statistical mechanical simulations of benzoic acid in aqueous solutions, K. Sagarik and B.M. Rode 260 (2000) 159

A rigorous procedure for combining molecular dynamics and Monte Carlo simulation algorithms, L.J. LaBerge and J.C. Tully 260 (2000) 183

Infrared and Raman spectra of 4-(dimethylamino)benzonitrile and isotopomers in the ground state and vibrational analysis, H. Okamoto, H. Inishi, Y. Nakamura, S. Kohtani and R. Nakagaki 260 (2000) 193

A modified perturbed hard-sphere-chain equation of state: consideration of attractive contribution, I.H. Kim and Y.C. Bae 260 (2000) 337

Linear and convolution methods for the analysis of ground and excited state kinetics. Application to the monomer-excimer scheme, M.N. Berberan-Santos, J.P.S. Farinha and J.M.G. Martinho 260 (2000) 401

Polymers

Relaxation of photo-exitations in films of oligo- and poly-(*para*-phenylene vinylene) derivatives, S.C.J. Meskers, R.A.J. Janssen, J.E.M. Haverkort and J.H. Wolter 260 (2000) 415

Biological systems

A rigorous procedure for combining molecular dynamics and Monte Carlo simulation algorithms, L.J. LaBerge and J.C. Tully 260 (2000) 183

*Microscopic and mesoscopic systems**Single atoms, molecules and assemblies (incl. biological)*

Density functional theory and Hartree-Fock-density functional theory calculations of ^{17}O , ^{33}S , and ^{73}Ge quadrupole coupling constants, W.C. Bailey, F.M. Gonzalez and J. Castiglione 260 (2000) 327

Molecules (neutral and ionic)

On the validity of the equivalent cores approximation for computing X-ray photoemission and photoabsorption spectral bands, O. Plashkevych, T. Privalov, H. Agren, V. Carravetta and K. Ruud 260 (2000) 11

Structure and ground and first electronic excited state vibrational modes of the ethyl-*p*-aminobenzoate conformers, A. Longarte, J.A. Fernández, I. Unamuno and F. Castaño 260 (2000) 83

Semi-empirical study of chain conformation and absorption spectra of polyanilines: size, solvent and disorder effects, Z.T. de Oliveira Jr. and M.C. dos Santos 260 (2000) 95

The photoabsorption and constant ionic state spectroscopy of vinylbromide, A. Hoxha, R. Locht, B. Leyh, D. Dehareng, K. Hottmann, H.W. Jochims and H. Baumgärtel 260 (2000) 237

Ab initio calculation for inner reorganization energy of gas-phase electron transfer in organic molecule-ion systems, X.-Y. Li, J. Tong and F.-C. He 260 (2000) 283

Vibronic interactions in {6} and {18}hetero(A,B)annulenes, M. Tachibana and K. Yoshizawa 260 (2000) 303

Hopfield neural network model for calculating the potential energy function from second virial data, J.P. Braga, M.B. de Almeida, A.P. Braga and J.C. Belchior	260 (2000) 347
The effect of carbonyl complexation on highly exothermic vanadium oxidation reactions, M.J. McQuaid and J.L. Gole	260 (2000) 367
<i>-small polyatomics</i>	
Orbital imaging for the valence shell of sulphur dioxide: comparison of EMS measurements with near Hartree-Fock limit and density functional theory, R. Feng, Y. Sakai, Y. Zheng, G. Cooper and C.E. Brion	260 (2000) 29
The equilibrium N-H bond length, J. Demaison, L. Margulès and J.E. Boggs	260 (2000) 65
An extended SU(2) model for coupled Morse oscillators, M. Carvajal, R. Lemus, A. Frank, C. Jung and E. Ziemniak	260 (2000) 105
Photodissociation dynamics of CH_2BrCl at 234 nm, S.-H. Lee, Y.-J. Jung and K.-H. Jung	260 (2000) 143
Impulsive IR-multiphoton dissociation of acrolein: observation of non-statistical product vibrational excitation in CO ($v = 1-12$) by time resolved IR fluorescence spectroscopy, P.K. Chowdhury	260 (2000) 151
Temperature dependent photoabsorption cross sections of allene and methylacetylene in the VUV-UV region, F.Z. Chen, D.L. Judge and C.Y.R. Wu	260 (2000) 215
Vertical triple ionization of ethyne molecules in triple-electron-transfer collisions with O^{2+} beam ions, N. Jeffreys, D.E. Parry and F.M. Harris	260 (2000) 295
UV, VUV and soft X-ray photoabsorption of dimethyl ether by dipole (e,e) spectroscopies, R. Feng, G. Cooper and C.E. Brion	260 (2000) 391
<i>-aromatics</i>	
Photoionization mass spectrometry of six isomers of C_7H_8 in the 7-22 eV photon energy range, M. Schwell, F. Dulieu, C. Gée, H.-W. Jochims, J.-L. Chotin, H. Baumgärtel and S. Leach	260 (2000) 261
Effect of solvent polarizability on dual fluorescence of <i>EE</i> -1-phenyl,4-(1'-pyrenyl)-1,3-butadiene, E. Marri, G. Galiazzo, U. Mazzucato and A. Spalletti	260 (2000) 383
<i>-other large</i>	
Photoionization mass spectrometry of six isomers of C_7H_8 in the 7-22 eV photon energy range, M. Schwell, F. Dulieu, C. Gée, H.-W. Jochims, J.-L. Chotin, H. Baumgärtel and S. Leach	260 (2000) 261
Theoretical analysis of low-lying vibrational modes of free canonical 2-deoxyribonucleosides, O.V. Shishkin, A. Pelmenschikov, D.M. Hovorun and J. Leszczynski	260 (2000) 317
<i>Molecular aggregates</i>	
Intermolecular potential for benzoic acid-water based on the test-particle model and statistical mechanical simulations of benzoic acid in aqueous solutions, K. Sagarik and B.M. Rode	260 (2000) 159
Relaxation of photo-excitations in films of oligo- and poly-(<i>para</i> -phenylene vinylene) derivatives, S.C.J. Meskers, R.A.J. Janssen, J.E.M. Haverkort and J.H. Wolter	260 (2000) 415
<i>-van der Waals molecules</i>	
Photoionization studies of $\text{C}_2\text{H}_5\text{I}$ and C_6H_6 perturbed by Ar and SF_6 , C.M. Evans, J.D. Scott, F.H. Watson and G.L. Findley	260 (2000) 225

Electronic spectroscopy and structures of the van der Waals complexes of α,ω -dihaloalkanes with anthracene, J.C. Hlady and R.P. Steer

260 (2000) 249

-clusters

Intermolecular potential for benzoic acid–water based on the test-particle model and statistical mechanical simulations of benzoic acid in aqueous solutions, K. Sagarik and B.M. Rode

260 (2000) 159

Free radicals (incl. hydronium and muonium)

Recombination yield of geminate radical pairs in high magnetic fields: general results and application to free diffusion, M.J. Hansen, A.A. Neufeld and J.B. Pedersen

260 (2000) 125

Phenomena

Molecular structure

Cytosine anions: ab initio study, D.M.A. Smith, A.F. Jalbout, J. Smets and L. Adamowicz

260 (2000) 45

Substituent effects on the intramolecular proton transfer in the ground and lowest-lying singlet excited states of salicylaldimine, M. Forés, M. Duran and M. Solà

260 (2000) 53

The equilibrium N–H bond length, J. Demaison, L. Margulès and J.E. Boggs

260 (2000) 65

An extended SU(2) model for coupled Morse oscillators, M. Carvajal, R. Lemus, A. Frank, C. Jung and E. Ziemniak

260 (2000) 105

Vibrations and rotations of molecules

Vibrational corrections to linear and nonlinear static electric properties of polyatomic molecules at non-optimum reference geometry, V.E. Ingamells, M.G. Papadopoulos and A.J. Sadlej

260 (2000) 1

Infrared and Raman spectra of 4-(dimethylamino)benzonitrile and isotopomers in the ground state and vibrational analysis, H. Okamoto, H. Inishi, Y. Nakamura, S. Kohtani and R. Nakagaki

260 (2000) 193

Theoretical analysis of low-lying vibrational modes of free canonical 2-deoxyribonucleosides, O.V. Shishkin, A. Pelmenschikov, D.M. Hovorun and J. Leszczynski

260 (2000) 317

Electronic structure and states

Orbital imaging for the valence shell of sulphur dioxide: comparison of EMS measurements with near Hartree–Fock limit and density functional theory, R. Feng, Y. Sakai, Y. Zheng, G. Cooper and C.E. Brion

260 (2000) 29

Cytosine anions: ab initio study, D.M.A. Smith, A.F. Jalbout, J. Smets and L. Adamowicz

260 (2000) 45

Substituent effects on the intramolecular proton transfer in the ground and lowest-lying singlet excited states of salicylaldimine, M. Forés, M. Duran and M. Solà

260 (2000) 53

Semi-empirical study of chain conformation and absorption spectra of polyanilines: size, solvent and disorder effects, Z.T. de Oliveira Jr. and M.C. dos Santos

260 (2000) 95

Temperature dependent photoabsorption cross sections of allene and methylacetylene in the VUV–UV region, F.Z. Chen, D.L. Judge and C.Y.R. Wu

260 (2000) 215

Vertical triple ionization of ethyne molecules in triple-electron-transfer collisions with O ²⁺ beam ions, N. Jeffreys, D.E. Parry and F.M. Harris	260 (2000) 295
<i>Electric and magnetic properties</i>	
Recombination yield of geminate radical pairs in high magnetic fields: general results and application to free diffusion, M.J. Hansen, A.A. Neufeld and J.B. Pedersen	260 (2000) 125
Density functional theory and Hartree-Fock-density functional theory calculations of ¹⁷ O, ³³ S, and ⁷³ Ge quadrupole coupling constants, W.C. Bailey, F.M. Gonzalez and J. Castiglione	260 (2000) 327
<i>Molecular interactions</i>	
Intermolecular potential for benzoic acid-water based on the test-particle model and statistical mechanical simulations of benzoic acid in aqueous solutions, K. Sagarik and B.M. Rode	260 (2000) 159
<i>Spectral bandshapes and intensities</i>	
Electronic spectroscopy and structures of the van der Waals complexes of α,ω -dihaloalkanes with anthracene, J.C. Hlady and R.P. Steer	260 (2000) 249
UV, VUV and soft X-ray photoabsorption of dimethyl ether by dipole (e,e) spectroscopies, R. Feng, G. Cooper and C.E. Brion	260 (2000) 391
<i>Coupling of electronic and nuclear motion</i>	
Vibronic interactions in {6} and {18}hetero(A,B)annulenes, M. Tachibana and K. Yoshizawa	260 (2000) 303
Relaxation of photo-excitations in films of oligo- and poly-(<i>para</i> -phenylene vinylene) derivatives, S.C.J. Meskers, R.A.J. Janssen, J.E.M. Haverkort and J.H. Wolter	260 (2000) 415
<i>Energy transfer processes</i>	
Relaxation of photo-excitations in films of oligo- and poly-(<i>para</i> -phenylene vinylene) derivatives, S.C.J. Meskers, R.A.J. Janssen, J.E.M. Haverkort and J.H. Wolter	260 (2000) 415
<i>Molecular photophysical processes</i>	
Temperature dependent photoabsorption cross sections of allene and methylacetylene in the VUV-UV region, F.Z. Chen, D.L. Judge and C.Y.R. Wu	260 (2000) 215
Photoionization studies of C ₂ H ₅ I and C ₆ H ₆ perturbed by Ar and SF ₆ , C.M. Evans, J.D. Scott, F.H. Watson and G.L. Findley	260 (2000) 225
UV, VUV and soft X-ray photoabsorption of dimethyl ether by dipole (e,e) spectroscopies, R. Feng, G. Cooper and C.E. Brion	260 (2000) 391
<i>Photochemistry</i>	
Substituent effects on the intramolecular proton transfer in the ground and lowest-lying singlet excited states of salicylaldimine, M. Forés, M. Duran and M. Solà	260 (2000) 53
Photodissociation dynamics of CH ₂ BrCl at 234 nm, S.-H. Lee, Y.-J. Jung and K.-H. Jung	260 (2000) 143

*Intramolecular dynamics**-vibrational energy redistribution (incl. vibrational dissociation)*

Impulsive IR-multiphoton dissociation of acrolein: observation of non-statistical product vibrational excitation in CO ($v = 1-12$) by time resolved IR fluorescence spectroscopy, P.K. Chowdhury

Vibrational energy storage in high pressure mixtures of diatomic molecules, E. Plönjes, P. Palm, W. Lee, M.D. Chidley, I.V. Adamovich, W.R. Lempert and J.W. Rich

260 (2000) 151
260 (2000) 353

Luminescence spectra, yields and lifetimes

Effect of solvent polarizability on dual fluorescence of *EE*-1-phenyl,4-(1'-pyrenyl)-1,3-butadiene, E. Marri, G. Galianzo, U. Mazzucato and A. Spalletti

260 (2000) 383

Nonlinear responses (incl. optical)

Vibrational corrections to linear and nonlinear static electric properties of polyatomic molecules at non-optimum reference geometry, V.E. Ingamells, M.G. Papadopoulos and A.J. Sadlej

260 (2000) 1

Reactions (incl. dissociation)

Recombination yield of geminate radical pairs in high magnetic fields: general results and application to free diffusion, M.J. Hansen, A.A. Neufeld and J.B. Pedersen

Photoionization mass spectrometry of six isomers of C_7H_8 in the 7-22 eV photon energy range, M. Schwell, F. Dulieu, C. Gée, H.-W. Jochims, J.-L. Chotin, H. Baumgärtel and S. Leach

Linear and convolution methods for the analysis of ground and excited state kinetics. Application to the monomer-excimer scheme, M.N. Berberan-Santos, J.P.S. Farinha and J.M.G. Martinho

260 (2000) 125
260 (2000) 261
260 (2000) 401

-isolated molecules

Photodissociation dynamics of CH_2BrCl at 234 nm, S.-H. Lee, Y.-J. Jung and K.-H. Jung

260 (2000) 143

Electron transfer

Ab initio calculation for inner reorganization energy of gas-phase electron transfer in organic molecule-ion systems, X.-Y. Li, J. Tong and F.-C. He

260 (2000) 283

Proton and hydrogen atom transfer

Substituent effects on the intramolecular proton transfer in the ground and lowest-lying singlet excited states of salicylaldimine, M. Forés, M. Duran and M. Solà

260 (2000) 53

Ionization (incl. Rydberg states)

Photoionization studies of C_2H_5I and C_6H_6 perturbed by Ar and SF_6 , C.M. Evans, J.D. Scott, F.H. Watson and G.L. Findley

The photoabsorption and constant ionic state spectroscopy of vinylbromide, A. Hoxha, R. Locht, B. Leyh, D. Dehareng, K. Hottmann, H.W. Jochims and H. Baumgärtel

260 (2000) 225
260 (2000) 237

Vertical triple ionization of ethyne molecules in triple-electron-transfer collisions with O²⁺ beam ions, N. Jeffreys, D.E. Parry and F.M. Harris

260 (2000) 295

Electronic process in gases

The effect of carbonyl complexation on highly exothermic vanadium oxidation reactions, M.J. McQuaid and J.L. Gole

260 (2000) 367

Structure of solids, liquids and gases

A rigorous procedure for combining molecular dynamics and Monte Carlo simulation algorithms, L.J. LaBerge and J.C. Tully

260 (2000) 183

Critical behaviour and phase transitions

A modified perturbed hard-sphere-chain equation of state: consideration of attractive contribution, I.H. Kim and Y.C. Bae

260 (2000) 337
